The institution is partially compliant with the curriculum review and improvement principle. While the basic processes for course review are provided in the self-study, there wasn't adequate documentation of a program review by faculty. Although the processes are in place and the faculty and administration discussed the processes to be used, the institution needs to have written explanations of these processes.	The institution agreed that while the practice of curriculum review currently occurs within the MBA program, the practice has not been promulgated by a written policy. As a result, the current curriculum and program review practice was documented into a formal written policy and approved by the Graduate Faculty Council and was submitted to IACBE in 2010.	We will continue to utlize the formal written policy regarding curriculum and program review that was approved by the Graduate Faculty Council and submitted to IACBE.

3. Complete the Outcomes Assessment Results form below and include it with this annual report to the IACBE. Note: Section II of the form (Operational Assessment) needs to be completed only if you received first-time accreditation or reaffirmation of accreditation after January 1, 2011.

An example of a completed form can be found in a separate document that is available for download on the IACBE's website at: www.iacbe.org/accreditation-documents.asp.

Section I (Student Learning Assessment) of the Outcomes Assessment Results form must be completed for each business program that is accredited by the IACBE (i.e., a separate table must be provided for each program).

Performance targets/criteria are the criteria used by the academic business unit in evaluating assessment results to determine whether intended outcomes have been achieved. For example, if the academic business unit is using the ETS Major Field Test as one of its direct measures of student learning, then a performance target might be that the Institutional Mean Total Score on the exam will place students in the upper quartile nationally; or if the academic business unit is using a comprehensive project in a capstone course as a direct measure of student learning, then a performance target might be that 80% of the students will score at the highest level (e.g., proficient, exemplary, etc.) on each project evaluation criterion.

Remember that your outcomes assessment plan needs to include two or more direct and two or more indirect measures of student learning. These measures should be used at the program level.

At the bottom of each section of the form, space is provided to identify changes and improvements that you plan to make as a result of your assessment activity.

Italicized entries in the form represent areas where the academic business unit should insert its own assessment information. Add tables and insert rows in the tables as needed.
