

## Health Screening Directions

The survey link can be accessed on the [BC COVID-19 website](#).

Nothing is more important than the health and safety of our employees, students, visitors, and communities. Our goal is to work together to stop the spread of COVID-19 and maintain a healthy campus community.

To achieve this, all employees, students, and visitors entering a Baker College location are required to complete a self-certification health screening prior to coming to campus daily attesting that they are asymptomatic of COVID-19 indicators. Only if unable to complete prior to coming to the campus, a station and/or paper form will be available at the designated entry.

These questions are intended to validate that you are asymptomatic and can safely come to campus.

**Assess each question and determine if you will respond with an overall “Yes” or “No” response.**

The three key questions asked are:

1. Excluding a chronic condition, have you had any of the following symptoms in the last 14 days: cough, shortness of breath, fever (100.4 or above), new loss of taste or smell, diarrhea, chills or repeated shaking with chills, or a sore throat?
2. In the past 14 days, have you tested positive for COVID-19?
3. Have you had close contact (excluding a professional capacity, such as a healthcare facility where appropriate PPE protocols are in place) within the last 14 days with someone diagnosed with COVID-19 or who has experienced COVID-19 related symptoms?

## Evaluate Survey Questions Based on Your Condition

If you are able to answer **“YES”** to **one or more of the survey questions**, select **“YES”** within the survey, then click **Submit**. If you answer yes to any of the questions, do not report to campus and wait for communication from Human Resources.

If you are able to answer **“NO”** to **all of the survey questions**, select **“NO”** within the survey, then click **Submit**.

Once your response is submitted, you will receive a confirmation message sent directly to your email.
