Health Screening Directions

The survey link can be accessed on the BC COVID-19 website.

Nothing is more important than the health and safety of our employees, students, visitors, and communities. Our goal is to work together to stop the spread of COVID-19 and maintain a healthy campus community.

To achieve this, all employees, students, and visitors entering a Baker College location are required to complete a self-certification health screening prior to coming to campus daily attesting that they are asymptomatic of COVID-19 indicators. Only if unable to complete prior to coming to the campus, a station and/or paper form will be available at the designated entry.

These questions are intended to validate that you are asymptomatic and can safely come to campus.

Assess each question and determine if you will respond with an overall “Yes” or “No” response.

The four key questions asked are:

1. Excluding a known medical or physical condition, have you had any of the following symptoms, as defined by the CDC: uncontrolled cough, shortness of breath, or fever (100.4 or above)?

2. Excluding a known medical or physical condition, have you had two or more of the following symptoms, as defined by the CDC: new loss of taste or smell, muscle aches, sore throat, severe headache, diarrhea, vomiting, or abdominal pain?

3. In the past 10 days, have you tested positive for COVID-19?

4. Have you had close contact (excluding a professional capacity, such as a healthcare facility where appropriate PPE protocols are in place), as defined by the CDC, with someone diagnosed with COVID-19 or who has experienced COVID-19 related symptoms?

Evaluate Survey Questions Based on Your Condition

If you are able to answer “YES” to one or more of the survey questions, select “YES” within the survey, then click Submit. If you answer yes to any of the questions, do not report to campus and wait for communication from Human Resources.

If you are able to answer “NO” to all of the survey questions, select “NO” within the survey, then click Submit.

Once your response is submitted, you will receive a confirmation message sent directly to your email.
