

## **FACILITY STANDARD OPERATING PROCEDURES FOR ENHANCED CLEANING AND DISINFECTING PROTOCOLS**

In alignment with [CDC recommendations](#), BC is taking measures to prevent community spread of COVID-19, which includes enhanced cleaning and disinfecting procedures at all of our campus locations. The Pandemic Response Team has identified the following cleaning and disinfecting procedures for BC campuses to follow during the COVID-19 public health situation.

Although surface transmission is not thought to be the strongest means of transmission of COVID-19, it is still important to clean frequently used surfaces. The facilities staff at BC is committed to ensuring the cleanliness of all common areas and commonly used surfaces including classrooms. Regular sanitation of frequently touched surfaces reduces the potential for COVID-19 to spread.

BC will continue to provide daily cleaning and disinfecting of the campus facilities. High touch surfaces on campus (primary building entrances, public restrooms, buttons, handrails, tables, faucets, doorknobs, and shared keyboards) will be cleaned and disinfected more frequently.

Disinfectant supplies such as wipes, sprays and paper towels will be available for student, faculty and staff use in all working and learning environments on campus. Anyone using a classroom space is encouraged to wipe down the area used before use with the materials provided. This includes chairs, tables, computers, keyboards and other electronic devices. BC provides and utilizes recommended [EPA-registered disinfectants](#).

Students living in Residence Halls/Student Apartments will regularly clean and disinfect their living areas. If appropriate cleaning supplies are not available to the students, BC will provide appropriate cleaning products. The cleaning and disinfecting of Residence Hall common areas will follow the same schedule at campus classroom buildings.

Enhanced protocols will be utilized to clean and disinfect areas upon notification of a sick or COVID-19 positive individual on campus. BC will follow procedures as recommended by the [CDC](#) in cleaning and disinfecting these areas and ensuring the health and safety of employees.

Hand sanitizing stations are provided throughout campus.

This document and the related practices and procedures will need to be regularly monitored to ensure compliance with CDC guidelines, State of Michigan and local jurisdiction regulations, and Baker College expectations.
